PROFESSIONAL SUMMARY

Full-Stack Software Engineer with hands-on experience building scalable web and mobile applications and working within enterprise software systems. Strong foundation in software engineering, database design, and RESTful API development, complemented by applied experience in computer vision and AI-assisted product development. Comfortable owning a project end-to-end — from architecture and development through integration, testing, and deployment.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, PHP, C#, SQL

Frontend & Mobile: React, React Native (Expo), Next.js, Progressive Web Apps (PWA), Inertia.js

Backend & APIs: Node.js, ASP.NET Core MVC, Laravel Breeze, RESTful API Design, MVC Architecture, Authentication & Authorization

Databases: PostgreSQL, MySQL, MSSQL

AI / Machine Learning: PyTorch, EfficientNet, Convolutional Neural Networks (CNN), Computer Vision, Gradio

Cloud, DevOps & Tools: Git, Docker, Oracle Cloud, SendGrid, Tkinter, dlib

Core CS & Practices: Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA), Computer Networks, Cybersecurity, SEO Optimization

PROFESSIONAL EXPERIENCE

Software Developer — Nizam & Sons

6 Months | Sialkot, Pakistan

- Developed and maintained the NCR application using .NET technologies, supporting core business operations.
- Led the migration of the application's database from Microsoft SQL Server to Oracle Database, analyzing existing schemas, queries, and data requirements to plan the transition.
- Adapted application-to-database interactions to ensure full compatibility with the Oracle-based environment following migration.
- Worked with NetSuite ERP to receive, process, and resolve support tickets, coordinating with business workflows.
- Investigated and troubleshooted application and database issues, contributing fixes that improved system reliability.

PROJECTS

SmartScan+ — AI-Assisted Health Screening & Consultation Platform

smartscanplus.vercel.app

- Architected and built a full-stack mobile health platform: React Native (Expo) app in TypeScript, Node.js backend, and PostgreSQL database.
- Developed computer vision models with PyTorch and EfficientNet for AI-assisted preliminary screening of anemia and skin lesions, explicitly framed as a screening aid rather than a medical diagnosis.
- Built real-time doctor-patient consultation and chat functionality for secure, live communication between patients and healthcare providers.
- Implemented authentication and authorization, secure data handling, automated PDF/report generation, and a Next.js-based admin dashboard for platform and consultation management.

The Smart WebCam

January 2024

- Engineered a Python desktop application with a Tkinter GUI and dlib-based face recognition for automated attendance tracking.
- Implemented CSV-based attendance logging and SendGrid email alerts, with support for webcams, IP cameras, and external camera sources.

Additional academic projects: a WebRTC-based communication project, a Learning Management System (LMS), and a Final Year Project (FYP) Management System — details available in portfolio.

EDUCATION

Bachelor of Science (BS) in Computer Science

2026

University of Sialkot

Associate Degree (ADP) in Computer Studies

2024

University of Sialkot

CERTIFICATIONS

- Oracle Certified Foundations Associate — Oracle (2025)
- Getting Started with AI on Jetson Nano — NVIDIA (2025)
- Introduction to Cybersecurity — Cisco Networking Academy (2025)
- AI For Everyone — DeepLearning.AI (2024)
